Summary

MuleSoft Developer with 2 years of hands-on experience in designing, developing, and supporting API-led integration solutions using Mule 4, DataWeave 2.0, and Anypoint Platform. Proven expertise in complex enterprise integrations, CloudHub deployments, CI/CD pipelines, and production support within Agile environments.

Experienced in delivering high-volume, performance-optimized data transformations, including large-scale Sales Posting integrations (~2,000+ lines of DataWeave mapping) ensuring accuracy, scalability, and reliability across enterprise financial and order management systems.

Strong in API design, error handling, performance tuning, and cross-system integrations, contributing to stable and scalable digital transformation initiatives.

Technical Skills

MuleSoft & Integration

MuleSoft Mule 4, Anypoint Studio, Anypoint Platform

- API-Led Connectivity, REST APIs, RAML, API Manager
- DataWeave 2.0 (advanced transformations & performance tuning)
- Batch Processing, Error Handling, Logging Frameworks

Cloud & DevOps

- CloudHub Deployments, Environment Configuration (Dev/QA/Prod)
- CI/CD using Jenkins, Git-based version control
- Monitoring, Production Support, Incident Resolution

Connectors & Technologies

- HTTP, Database, Salesforce, File, SFTP, MQ (basic exposure)
- JSON, XML, CSV transformations
- SQL, Python, C, HTML, CSS
- Postman, Git, Jenkins, Jira, Agile/Scrum

MuleSoft Certified Developer – Level 1 (MCD L1)

Salesforce (MuleSoft) — 2024

- MuleSoft Certified Integration Architect (MCIA)

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions — MuleSoft Developer

Aug 2022 – Aug 2024

Project: Levi's Enterprise Integration (Eprise Solar Dev T&M)

Worked across development, enhancement, and production support of enterprise MuleSoft integrations enabling seamless communication between business-critical systems

Key Responsibilities & Achievements

- Designed and implemented **enterprise-grade MuleSoft integrations** using Mule 4 and API-led architecture, translating business requirements into scalable REST API solutions.
- Developed **complex DataWeave 2.0 transformations** across JSON, XML, and CSV formats, including a high-complexity Sales Posting integration with **2,000+ lines of transformation logic** for financial data processing.
- Optimized API and transformation performance using **modular reusable functions, efficient**

filtering, and conditional logic, improving system maintainability and execution efficiency.

- Executed **end-to-end integration lifecycle** including unit testing, system testing, CI/CD deployments across Dev/QA/Prod environments, production monitoring, incident resolution, and Agile collaboration with QA, DevOps, and business stakeholders.

Projects

Machine Learning Model Implementation / *Apache Spark*

April 2025 – May 2025

- Built scalable ML pipelines using Spark SQL and MLlib.
- Trained and tuned Random Forest, SVM, and XGBoost models.
- Evaluated performance using precision metrics and ROC curves

Chess AI using Alpha-Beta Pruning / *Python*

April 2025 – May 2025

- Developed AI gameplay using Minimax and Alpha-Beta Pruning.
- Optimized move evaluation for faster decision-making.
- Implemented heuristic-based strategy and version control via GitHub.

Education

Master of Science in Data Science

University of New Haven, Connecticut, USA

Graduated: 2026

CGPA: 3.59 / 4

B.Tech Electrical & Engineering

St. Joseph's College of Engineering, Chennai, India

Graduated:2022

CGPA: 8.31/10
